

The following Listing of the Claims will replace all prior versions and all prior listings of the claims in the present application:

1.-14. (Cancelled)

15. (Cancelled)

16.-19. (Cancelled)

20. (Previously presented): An intracellularly binding immunoglobulin molecule comprising: a variable heavy chain comprising the amino acid sequence of SEQ ID No 3; and a variable light chain.

21.-26. (Cancelled)

27. (Previously presented) A method of selectively binding an intracellularly binding immunoglobulin molecule to a ligand in an intracellular environment, the method comprising contacting the intracellularly binding immunoglobulin molecule comprising a variable heavy chain comprising the amino acid sequence of SEQ ID No 3 and a variable light chain, with BCR or BCR-ABL in an intracellular environment, wherein BCR or BCR-ABL is selectively bound by said molecule.

28. (Cancelled)
